Introduction

The purpose of this manual is to provide a comprehensive reference guide for the reporting of BPP statistics to the Tariff Advisory Committee (TAC), National Data Repository for insurance. The data submitted to TAC will be used to build an industry database for BPP Class of Business with the following objectives:-

- i) To compile Periodic Market Reports
 - ii) To undertake Rating and Risk Classification Studies
 - iii) To perform Statistical Analysis
 - iv) To establish benchmarks for the industry
- To ensure smooth shift towards de-tariffed market

This manual aims to detail the relevant statistical fields to be captured and submitted by insurers. Proper front-end capturing of insured and claim data is therefore critical to the accurate reporting of data. The data dictionary attempts to create common standards, uniform understanding and consistent interpretations of all data terms. The data fields to be submitted have been carefully selected based on developments in more mature, liberalized markets so as to prepare insurers for eventual detariff scenario and possible removal of the tariff. It is therefore of critical importance that insurers invest sufficient resources in the beginning to ensure that both your company's database vis-à-vis data submissions to TAC are both complete and accurate. It is also pertinent to note that due to the dynamic nature of our business that the data fields listed in this manual are not exhaustive. It is therefore recommended that companies adopt the data specifications enclosed herein as a minimum standard, capturing additional data on insureds and risks, which the insurer feels may be important for their organization.

Chapter 1

1.1 Frequency of Reporting

All data shall be submitted on a quarterly basis. The deadline for submission of data for a particular quarter will be 21 days following the conclusion of the calendar quarter i.e. 21st April, 21st July, 21st October & 21st January.

1.3 Technical Specifications

The data will be uploaded onto a server using the Windows 2003 operating system. Companies should therefore ensure that the data submitted is in a format that can be read by the above system.

The database software used to upload the data is SQL server and for statistical analyses SPSS package is used.

1.3.1 Filename

The data files submitted must have the following file naming convention:-

Insurer Code _ FormNo_Period_Submission

Where;

Insurer code will be the code allotted to each insurer

Period = year i.e. 0405 for 2004-2005

Submission = 0 for Original submission, 1 for 1st revised submission etc.

E.g.

Insurer Code : 999 Form No = F1 a : Period = 2004-05 Submission = Original

Filename : 999_F1a_0405_0.txt
